

Cloud Service Providers Comparison

This document compares AWS, Google Cloud, and Microsoft Azure.

Compute:

AWS EC2, GCP Compute Engine, Azure Virtual Machines.

Storage:

AWS S3, GCP Cloud Storage, Azure Blob Storage.

Databases:

AWS RDS/DynamoDB, GCP Cloud SQL/BigQuery, Azure SQL/Cosmos DB.

Networking:

VPC, Load Balancers, CDN across all providers.

Pricing:

All follow pay-as-you-use model:

- Pay for compute time
- Pay for storage used
- Pay for data transfer

Conclusion:

AWS is most flexible, GCP best for analytics, Azure best for enterprise integration.
